

EarthCam's live view from NASA international space station

By Margaret Claire Layug/LDF, GMA News • July 17, 2019

There's something inexplicably enticing about being a tourist without leaving the comfort of your home.

You can now catch a livestream from outer space.

This literally out-of-this-world view from NASA's International Space Station was shared by [EarthCam](#) in commemoration of the historic 1969 Apollo 11 moon landing's 50th anniversary.

Check it out: <https://www.earthcam.com/usa/florida/orlando/nasa/?cam=nasa>

EarthCam provides live streaming video, time-lapse construction cameras and photography documentation for corporate and government clients in major cities around the world.

According to company, viewers can view a sunrise or sunset every 45 minutes as the NASA space station orbits the Earth once every 90 minutes.

EarthCam said visitors can even experience life as an astronaut with live internal views when the crew is on duty.
